

Insurance Laboratory Tests

Issued by Adviser:

Policy Number:

Mr Mrs Miss Ms

Surname:

First Names:

Sex: Male Female

Date of Birth: day / month / year

Address:

Send test results to: Chief Medical Officer, AMP Services (NZ) Limited, PO Box 1290, Wellington.

Please also send copy to usual doctor: Dr

Please complete the following blood tests **only** if the box is ticked:

- (a) HIV Antibody Test
- (b) Lipids
- (c) Creatinine
- (d) Glucose
- (e) ALK PHOS, GGT and ALT only
- (f) Hepatitis B Surface **Antigen**
& Hepatitis C **Antibody**

- (g) Complete Blood Count
- (h) Micro-Urinalysis
- Prostate Specific Antigen (PSA)
- Other:

Please obtain the insurance applicant's signature, witnessed by the nurse or technician who draws the blood, and return this form with the test results and account to me.

While we encourage our clients to have the tests in a fasting state, the tests can still be performed if the client has not fasted.

DG Carroll, FRACP
Chief Medical Officer

Witnessed by Laboratory
Technician or Nurse

Signature of Insurance Applicant

Date: day / month / year

Instructions

- 1 The applicant must have signed an application including acknowledgement that if blood tests are performed, they will include one for the presence of the AIDS Virus. Please note on the application that you have arranged blood tests.
- 2 Blood test requirements are based on cover effected **since previous** AMP blood tests, and are required when:
 - (a) total life cover with **AMP only**, including proposed cover, is \$500,001 or more.
 - (b) total AMP replacement income insurance (RII) cover, including proposed cover, is \$6,001 monthly benefit or more (or for increases to “old term” RII policies, blood tests are required at \$3,001 total monthly benefit); or applications for RII that have AIDS cover.
 - (c) Refer Rates & Options Book, H7 (or page 5 of the Underwriting Guide) for levels of cover at which the Complete Blood Count and Micro-urinalysis are required.
- 3 Ideally the blood tests should be done in a fasting state (i.e. no food or drink to be taken for 10-12 hours before the test except plain water, weak black tea or coffee, without sugar). However, if this is particularly inconvenient for the client, the tests may be done non fasting. **In some cases this may necessitate repeat tests.**
